

Brainstorming - Idea Generation - Prioritization

HealHub Project Ideation Phase

Project	HealHub
Tagline	Care At Your Fingertips
Domain	Healthcare / Doctor Appointment Booking
Stack	MERN Stack
Generated On	13 June 2026

Brainstorming Goal

The purpose of this phase is to identify practical real-world problems that can be solved using a MERN stack web application and prioritize a feasible internship project idea.

Idea Pool

Idea	Problem Addressed	Feasibility	Impact
HealHub doctor booking	Difficulty in booking doctor appointments	High	High
E-commerce app	Online shopping flow	High	Medium
Student portal	Campus communication	Medium	Medium
Event booking	Venue and resource booking	Medium	Medium

Selected Idea

HealHub was selected because healthcare appointment booking is a real-world use case, supports multiple roles, requires database interaction, and demonstrates complete MERN stack development.

Prioritization Matrix

Criterion	HealHub Score / 5	Reason
Real-world relevance	5	Healthcare appointment booking is practical and useful.
Technical learning	5	Includes frontend, backend, database, auth, roles, APIs, deployment.
Time feasibility	4	Can be completed in internship deadline with focused scope.
Demo value	5	Easy to explain and demonstrate to mentors.
Future expansion	5	Admin dashboard, notifications, and analytics can be added later.
