Patient Empathy Map

Says	Thinks	Does	Feels
I need a doctor appointment quickly.	I hope the doctor is available.	Searches doctors and books a slot.	Relieved when booking is confirmed.
I do not want a complicated app.	Phone login is easier than email.	Uses simple form fields.	Comfortable with clear UI.

Doctor Empathy Map

Says	Thinks	Does	Feels
I need to manage appointment requests.	I should know who is visiting and when.	Views dashboard and appointments.	Organized and in control.
I may need to decline some appointments.	Patients should know the reason.	Accepts or declines requests.	Responsible and professional.
