

Problem - Solution Fit

HealHub Project Design Phase

Project	HealHub
Tagline	Care At Your Fingertips
Domain	Healthcare / Doctor Appointment Booking
Stack	MERN Stack
Generated On	13 June 2026

Problem Fit

Manual doctor appointment booking can be time-consuming, especially when patients need to search for doctors, know availability, and confirm appointments. Doctors also need a clear way to view appointments.

Solution Fit

HealHub provides a single digital platform where patients can view doctors, register, login, book appointments, and track status, while doctors can register and access their dashboard.

Fit Matrix

Problem	HealHub Solution
Finding doctors	Doctors page connected to backend database.
Separate user needs	Patient and doctor registration pages.
Appointment management	Appointment form and dashboards.
Ease of use	Simple forms, phone-based login, clean interface.
Project demonstration	Deployed frontend, backend, and database.
