

Requirement Analysis

Functional and Non-Functional Requirements

Project	HealHub
Tagline	Care At Your Fingertips
Domain	Healthcare / Doctor Appointment Booking
Stack	MERN Stack
Generated On	13 June 2026

Functional Requirements

ID	Requirement
FR1	Patient should be able to register with personal details.
FR2	Doctor should be able to register with professional details.
FR3	Users should login with phone number and password.
FR4	System should display doctors from backend database.
FR5	Patient should book an appointment with a selected doctor.
FR6	Patient dashboard should show appointment details.
FR7	Doctor dashboard should show appointment requests.
FR8	System should support role-based navigation and dashboard redirection.

Non-Functional Requirements

Requirement	Description
Usability	UI should be simple and suitable for patients including older users.
Performance	Pages should load quickly and API response should be handled gracefully.
Security	Sensitive environment variables must not be exposed in frontend code.
Availability	Frontend and backend should be deployed on cloud platforms.
Maintainability	Code should be organized into frontend, backend, routes, models, and pages.

User Roles

Role	Access
Patient	Register, login, view doctors, book appointment, view patient dashboard.
Doctor	Register, login, view doctor dashboard, manage appointments.
Admin - Future Scope	Approve doctors, view statistics, manage platform data.
